

The Adheco Advantage

For many decades, leading adhesives manufacturers have been developing and proving the advantages of Water Based Adhesives. The technology has evolved to the point where we can now provide a Water Based Adhesive to replace existing solvent adhesives with equal or better production speed and end bonding performance.

Better Value

Adheco's range of Water Based Adhesives and associated equipment offer manufacturers improved product design flexibility, more efficient production and superior end use performance.

Green

Regulatory agencies are increasing pressure on manufacturers to reduce solvent use. Adheco's range of adhesives meet or exceed current environmental compliance requirements.

Safety

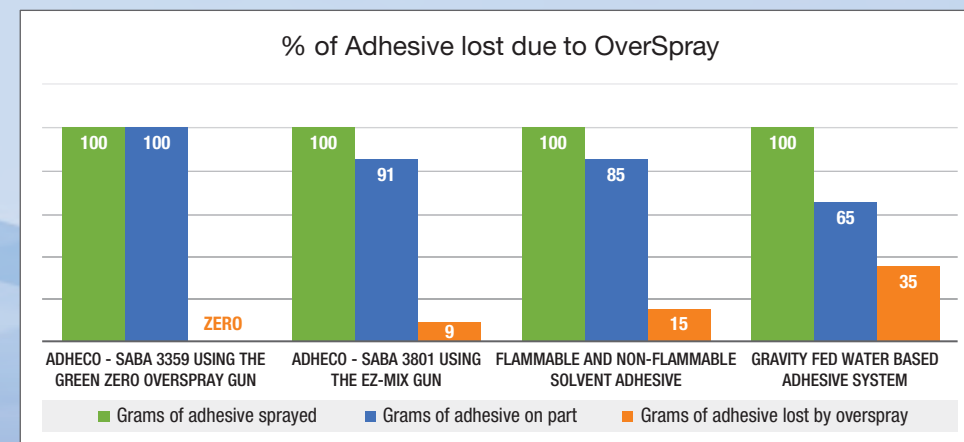

Workplace safety is another area where regulatory agencies and insurers are increasing pressure on manufacturers. The elimination of toxic and/or flammable solvents means safer working conditions at lower cost.

Water Based Adhesives ... industry wide.

Water Based Adhesives are now finding successful applications across an ever wider range of manufacturing processes. These highly efficient adhesives are producing high performance bonds between ever expanding combinations of materials.

Foam Fabricating

Upholstered Furniture Manufacturing

Laminating

Mattress Manufacturing

Office Chair Manufacturing

Spray Guns

Efficient utilization of adhesives depends critically on the spray gun. Adhco offers a specialized range of spray guns for both one and two component adhesive systems that ensure continuous optimum transfer efficiency in any manual or automated production environment.

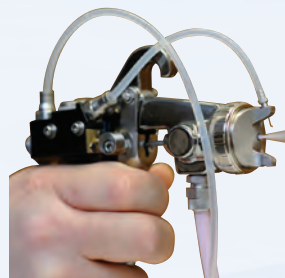

SABA Green Zero Overspray Gun, 100% Transfer Efficiency

SABA Zero Overspray 'breakthrough technology'. A proven transfer efficiency of 100%. This makes SABA Zero Overspray a powerful innovation. Combined with the smart SABA Green Zero Overspray gun the new Sababond 3300 Series of adhesives makes the "impossible" possible.

Benefits include:

- Cleaner and safer work environment
- Notable adhesive savings
- Maximum transfer efficiency
- Light weight to ease arm strain

SABA Ez-Mix Gun

SABA Ez-Mix gun for two component Water Based Adhesives.

Benefits include:

- Simple to operate and maintain
- Minimizes overspray for efficiency and cost savings
- Light weight to ease arm strain
- Great fan control

SABA Dux Gun

SABA Dux gun for one component Water Based Adhesives.

Benefits include:

- Simple to operate and maintain
- Minimizes overspray for efficiency and cost savings
- Light weight to ease arm strain
- Great fan control

Binks 95PCXT Gun

The Binks 95PCXT is designed for two component Water Based Adhesives.

Benefits include:

- Low maintenance
- Unique "Tornado Ring" maximizes mixing of adhesive and activator
- 3 options of nozzle sizes to pair production speed with adhesive

Dispensing Systems

Precision pressure control for consistent adhesive flow is essential for the most efficient utilization of one or two part adhesive materials. Adhco offers a full range of adhesive dispensing systems that provide maximum efficiency for large or small, automated or manual production environments.

SABA Plug 'n Spray System is an affordable 5 gallon system.

The SABA Plug 'n Spray is available in two water based versions; one for more challenging applications; pinch bonds and bonding to plastics, and the other for general purpose bonding; foam to foam, foam to wood, foam to fibre.

Benefits include:

- Little set up and easy to use
- Mobile and compact
- Recyclable

Low cost dispensing spray system.

SABA Access System

The SABA Access System reduces adhesive waste caused by overspray and system inefficiencies, resulting in huge cost savings and a cleaner plant. This pressurized system is designed to deliver a constant flow rate to each spray station regardless of the amount of adhesive in the tote.

Benefits include:

- Feeds up to 25 spray guns from a single tote
- Delivery vessel refills with the push of a button
- No down time when changing tote

SABA Pump System

SABA uses specially engineered ultra-low pulsation double diaphragm pumps to supply both the adhesive and activator to the spray stations.

Benefits include:

- Low maintenance
- Provides consistent and optimized adhesive flow
- Feeds up to 18 spray guns from a single tote

Adhco Easy Spray 5 gallon Pail System

5 gallon pail slides directly into tank. Designed for use with one or two part water based adhesives.

Benefits include:

- Fast, easy pail change
- Precision pressure control for consistent adhesive flow
- Low maintenance

Adhco Easy Spray Drum System

Drum is safely pressurized to permit dispensing directly from the drum with no need for pressure pots or pumps. Designed for use with one or two part Water Based Adhesives.

Benefits include:

- Fast, easy drum change
- Precision pressure control for consistent adhesive flow
- Low maintenance

Roll Coater

For those applications where roll coating is desired Adhco has a variety of products available to be used in roll coating equipment.
